Traditional Chinese Medicine (TCM)
中醫

Traditional Chinese Medicine built on a foundation of more than 3,000 years of medical practice that includes various forms of:

- Herbal medicine
- Acupuncture (針灸)
- Pressure point massage (推拿)
- Exercise (氣功): exercise and meditation, regulated breathing, slow movement, and focused awareness, to cultivate and balance qi
- Suction Cupping (拔罐): "reverse-pressure massage".
- Diē-dá (跌打): bone-setting to treat fractures, sprains, and bruises
- Gua Sha (刮痧): bruising of skin
Doctrines of Chinese Medicine are Rooted in These Books

- Emperor Huang's Private Canon (黃帝內經)
- Yin-Yang (陰陽)
- Five Elements Theory (五行)
- Treatise on Cold Damage Disorders and Miscellaneous Illnesses (傷寒論)
Emperor Huang's Private Canon
(黄帝内經)

- It rejected the influence of spirits or the use of magic as the cause of disease
- It tried to explain
  - The relationship between humans and their environment
  - The contents of the human body, vitality and pathology, and pattern of disharmony
  - How to make diagnostic and therapeutic decisions in light of all these factors
- It is one of the first books that describe doctrines of Yin-Yang and the Five Elements Theory
Ancient Chinese concepts which can be traced back to the Shang dynasty (1600–1100 BC)

They represent two abstract and complementary aspects that every phenomenon in the universe can be divided into:

<table>

Five Elements Theory
五行

Five Elements Theory presumes that all phenomena of the universe can be broken down into five elemental qualities:
- Wood (木)
- Fire (火)
- Earth (土)
- Metal (金)
- Water (水)
Primary Functional Entities in TCM

- Organs: Constitute the center piece of bodily functions (not anatomy)
  - The five Zàng 脏 ("Thoracic") Organs
    - Heart, Liver, Spleen, Lung, Kidney
    - Yin in nature
  - The six Fǔ 腑 ("Abdominal") Organs
    - Small Intestine, Large Intestine, Gallbladder, Urinary Bladder, Stomach and Three Cavities (Thoracic, Abdominal and Pelvic)
    - Yang in nature

- Chi or Qì (氣) & Meridians

- Xuĕ (血): Blood & Blood Vessels
Primary Functional Entities in TCM

- Organs

- Chi or Qì (氣) & Meridians (經絡)
  - Channels “Meridians” of body vital energy “Chi” link between organs
    - Actuation (推動) – circulate bodily fluid and blood, actuate organ function
    - Warming (溫煦) – the body, especially the limbs.
    - Defense (防御) – against exogenous pathogenic factors
    - Containment (固攝) – of bodily fluids from leakage or excessive emission.
    - Transformation (氣化) of food, drink and breath into chi

- Xuĕ (血) Blood: nourishing organs via blood vessels that link between organs
Concept of Diseases in TCM

- Health is perceived as the harmonious interaction of these entities and the outside world.
- Disease is interpreted as a disharmony in these interactions.
Treatise on Injury and Cold Illnesses (傷寒論)

- Compiled by Zhang Zhongjing sometime before the year 220 AC, at the end of the Han dynasty
- It is among the oldest complete clinical textbooks in the world
- Group symptoms into "patterns" (zheng 證) that could serve as targets for therapy
- Assigns organs, symptoms and medicinals to different nature of Yin-Yang and the Five Elements for direction of drug therapy
Five Elements Theory 五行

- Fire (火) = Heart (心) and Small Intestine (小腸) (and, secondarily, Sānjiaō [三焦, "Triple Burner"] and Pericardium [心包])
- Earth (土) = Spleen (脾) and Stomach (胃)
- Metal (金) = Lung (肺) and Large Intestine (大腸)
- Water (水) = Kidney (腎) and Bladder (膀胱)
- Wood (木) = Liver (肝) and Gallbladder (膽)

The zàng-fǔ are also connected to the twelve standard meridians
- Each yang meridian is attached to a fǔ organ
- Each yin meridians is attached to each of zàng plus the Pericardium, a peculiar entity almost similar to the Heart zàng
Diagnosis and Treatment

Diagnosis of illness aims to identify “pattern” or group of symptoms (syndrome) of an underlying disharmony by
- Inspecting the tongue, skin, and eyes
- Palpation of the pulse
- Looking at the eating and sleeping habits of the person as well as many other things

Treatment is given based on the "pattern of disharmony"
Examination of Tongue

- Observation of tongue surface, color, moisture and teeth marks
- Certain sections of the tongue's surface are believed to correspond to different “Organs”.
- For example, teeth marks on one part of the tongue might indicate a problem with the Heart, while teeth marks on another part of the tongue might indicate a problem with the Liver.
Wrist Pulse Examination

- Patients are examined fully clothed
- Palpation made at three positions on each wrist, each position is thought to correspond with certain zàng-fŭ (Organs)
  - Cun (inch, 寸) position: distal, at wrist crease
  - Guan (gate, 关) position: mid, 1 fingerbreadth from wrist crease
  - Chi (foot, 尺) position: proximal, 2 fingerbreadths from wrist crease
- Palpation is carried out at three different depths (pressure levels) on each wrist to determine the nature of pulse
Wrist Pulses Examination

3 Positions
Place 3 fingers over radial artery, with middle (guan) position over the styloid process of the wrist.

- **Left Hand**
  - First position (Cun): Heart
  - Middle position (Guan): Liver
  - Third position (Chi): Kidney yin

- **Right Hand**
  - First position (Cun): Lung
  - Middle position (Guan): Spleen
  - Third position (Chi): Kidney yang

- **Both Hands**
  - Superficial level: Heaven
  - Middle level: Human
  - Deepest level: Earth

3 Levels
Press fingers over radial artery first lightly, increasing pressure gradually to moderate force, then lastly to deep.

While palpating each pulse location and depth, take note of pulse speed, strength, shape and rhythm.

Together these elements make up a TCM pulse diagnosis. Here are some of the more clinically common pulses:

- **Superficial pulse (fu mai)**
  - Easily felt with gentle touch.
  - Typically indicates exterior syndromes in the early stage.

- **Deep pulse (chen mai)**
  - Felt only on heavy pressure.
  - Typically indicates interior syndromes.

- **Slow pulse (chi mai)**
  - Less than four beats per breath.
  - Typically indicates cold syndromes.

- **Rapid pulse (shu mai)**
  - More than 5 beats per breath.
  - Typically indicates heat syndromes.

- **Weak pulse (chen mai)**
  - Forceless at all 3 positions, in all 3 levels.
  - Typically indicates syndromes of a deficiency type.

- **Forceful pulse (shi mai)**
  - Forceful at all 3 positions, all 3 levels.
  - Typically indicates syndromes of an excess type.

- **Wiry pulse (xuan mai)**
  - Feels taut, straight & long, like the string of a guitar.
  - Typically indicates disorders of the liver & gallbladder channels, pain and phlegm/fluid retention.

- **Threaded pulse (xi mai)**
  - Feels like a fine thread, but is distinct and clear.
  - Typically indicates deficiency due to overstrain & stress or deficiency of qi and blood.

- **Slippery pulse (hua mai)**
  - Feels smooth and flowing like pearls on a dish.
  - Typically indicates phlegm & fluid retention, retention of food and excess heat.
Diagram of Pattern & Treatment

Example:

- **Diagnosis:** "Upflaming Liver fire" (肝火上炎)
  - Headache, red face and eyes, dry mouth, nosebleeds, constipation, vomiting of sour or bitter fluids, cough up blood, irritable mood;
  - Red tongue with dry yellow fur;
  - Slippery and string-like pulse

- **Treatment:**
  - Medicinals in the “Water” category of Five Elements Theory and Yin in nature are given to clear the “Fire”
  - and/or supplement the Liver
Acupuncture

Treatment may also include acupuncture

- Using metal needles to stimulate specific points along the “meridians” that link to “Liver”
- To enhance Chi and normalize the function of “Liver”
Does Acupuncture Work?

针灸

- The US NIH & National Cancer Institute (NCI): review of 17,922 patients
  - Acupuncture relieved muscle and joint pain, caused by aromatase inhibitors, much better than control

- The US NIH National Cancer Institute: In cancer patients
  - Acupuncture may cause physical responses in nerve cells, the pituitary gland, and the brain - releasing proteins, hormones, and chemicals that are proposed to affect blood pressure, body temperature, immune activity, and endorphin release

- The US NIH National Center for Complementary and Integrative Health (NCCIH)
  - Research suggests that acupuncture can help manage certain pain conditions, but evidence about its value for other health issues is uncertain.
  - Acupuncture is generally considered safe when performed by an experienced, well-trained practitioner using sterile needles.

Ger Hong 葛洪, a fourth-century Taoist, physician, alchemist and herbalist first used Sweet Wormwood to treat fever: “this herb should be soaked in cold water”.

Heating the sweet wormwood preparation would destroy its potency. However, extracts from the fresh herb without heating turned out surprisingly effective in killing the malaria parasites.

Artemisinin, the active compound has an unprecedented potency in the treatment of severe malaria.

Professor Tu was awarded 2015 Nobel Prize in Physiology or Medicine.

“Toxin” in Herb Becomes Medicine for Leukemia

In 1970s Chinese researcher Zhang TingDong and colleagues investigated the medicinals traditionally used to treat “Blood disease” and extract the major component arsenic trioxide.

His work eventually led to the development of the drug Trisenox, which was approved by the FDA in 2000 for treatment of leukemia.

Streptomyces avermitilis Cultured from Soil Contamination

- Avermectin and its deriviative, Ivermectin are effective in killing of parasite larvae (microfilaria) that cause
  - River Blindness (chronic inflammation in the cornea caused by Onchocerciasis)
  - Lymphatic Filariasis (Elephantiasis Lymphedema and Scrotal Hydrocele)

- This work earned Drs. William C. Campbell and Satoshi Ōmura 2015 Nobel Prize in Physiology or Medicine
If You Are Thinking About Using Traditional Chinese Medicine

- Do not use it to replace effective conventional care or delay seeing a health care provider
- It is better to use herbal remedies under the supervision of a professional trained in TCM than to try to treat yourself
- Check credentials and license of the TCM practitioner on nccih.nih.gov
- If you are pregnant or nursing, or are thinking of using TCM to treat a child, you should be especially sure to consult your the child’s health care provider.
- List all Chinese herbs you take in your medicine list to avoid serious drug interaction
Research Direction

- Pharmaceutical research has explored the potential for creating new drugs from traditional remedies, with few successful results.

- More researches are needed
  - using modern methods and instruments
  - randomized controlled trials
