

MEET YOUR PHYSICIAN

DANIEL SHERBET MD INTERVENTIONAL CARDIOLOGY

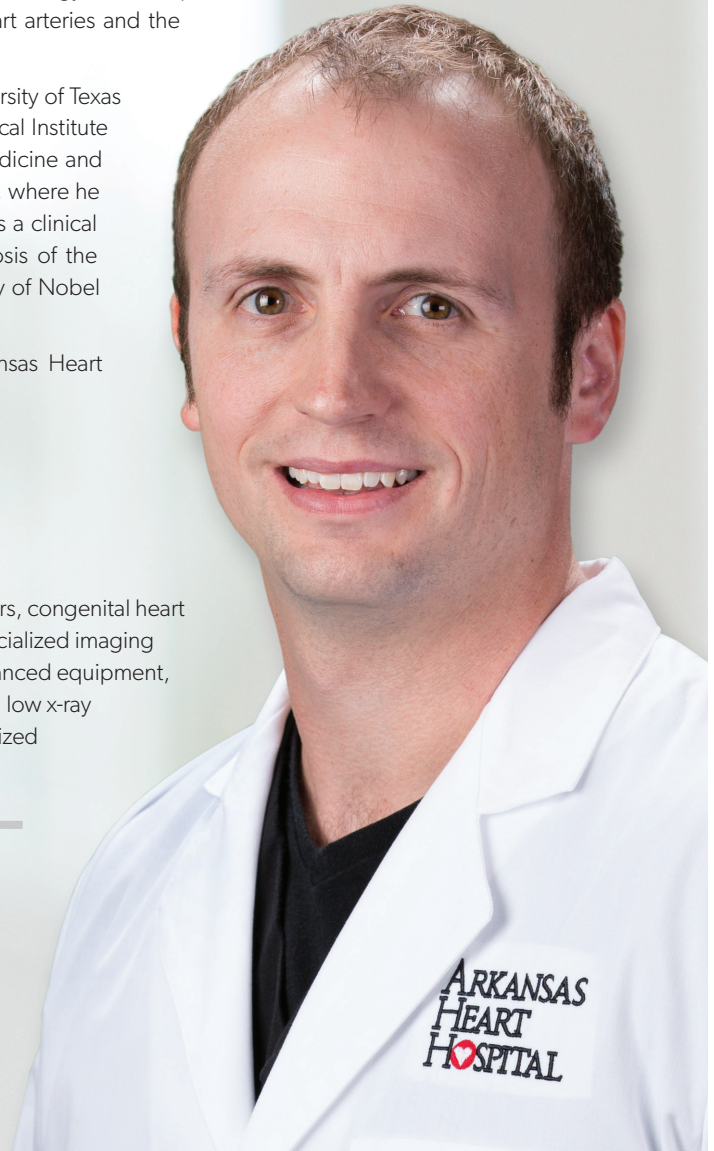

Dr. Daniel Sherbet is an interventional cardiologist, caring for patients with all forms of heart and vascular disease. He is board-certified in cardiovascular disease and interventional cardiology and an expert in heart catheterization and procedures for opening blockages of the heart arteries and the arteries of the legs.

A native Texan, he earned an M.D. with Distinction in Research at the University of Texas Southwestern Medical School, where he was also a Howard Hughes Medical Institute medical student research fellow. He completed a residency in internal medicine and fellowships in cardiology and interventional cardiology at UT Southwestern, where he was inducted into the Alpha Omega Alpha Honor Medical Society. He has a clinical interest in disorders of cholesterol metabolism and resultant atherosclerosis of the arteries, which began during his time as a research fellow in the laboratory of Nobel laureates Michael Brown and Joseph Goldstein at UT Southwestern.

Dr. Sherbet and his wife, Dr. Monica Lo, an electrophysiologist at Arkansas Heart Hospital, enjoy traveling and spending time with their young daughter.

DR. SHERBET SPECIALIZES IN INTERVENTIONAL CARDIOLOGY.

Interventional cardiologists treat coronary artery disease, heart valve disorders, congenital heart disease and more through nonsurgical, catheter-based procedures and specialized imaging techniques. Arkansas Heart Hospital's eight catheterization labs feature advanced equipment, known throughout the healthcare industry for outstanding image quality and low x-ray radiation dose to both the patient and staff. The hospital is a globally recognized cardiac training center.
