

HEALING STARTS HERE

The Wound Care & Hyperbaric Center

The Arkansas Heart Hospital's Wound Care Center is a comprehensive outpatient center designed for the treatment of chronic, non-healing and complex wounds. We pride ourselves on our timely scheduling and family atmosphere for our patients. To learn more about our Wound Care Center and how it can help you treat complex wounds, complete the form below.

Every member of our team is committed to working together for the advancement of wound healing needs. The Wound Care Center provides individualized treatment plans for patients, specific to their needs, in a quick and efficient manner.

Hyperbaric medicine, bioengineered skin substitutes and vacuum assisted closures are just a few of the advanced techniques we employ to help patients' wounds heal faster and allow them to return to their normal lives.
